

WORKING WITH
OUR CLIENTS AND
VENDORS TO
OFFER *SENSIBLE*
SOLUTIONS TO
REAL-WORLD
PROBLEMS.

Aquatherm—*Fusion-Welded Piping Systems*

aquatherm.com

- High-integrity specialized PolyPropylene Random (PP-R) piping for pressure piping systems
- 1/2" through 24" piping in Aquatherm Blue Pipe and Aquatherm Green Pipe
- Green Pipe carries NSF 14, 51 and 61 certifications for Potable Water
- Specialized system handles high temperature and pressure with minimal thermal expansion
- Acuity is a factory Partner with local inventory, tooling, and training support

Alfa Laval Authorized Distributor—*Market Leader in Sanitary and High-Purity Processing Equipment*

alfalaval.com

- Heat Transfer equipment including plate-and-frame, tubular and point-of-use coolers
- Alfa Laval UltraPure Radial and Standard Diaphragm Valves
- Seat, MixProof, Butterfly, and check valves
- Tri-Clover® Tri-clamp and Orbital Weld BPE fittings
- High-Purity Rotary Lobe and Centrifugal pumps, pump assemblies, testing and repair
- Tank equipment and weighing instrumentation

FlowSmart—*High Purity Polymers*

flowsmartinc.com

Gasketing Systems

- High-performance sanitary gasket and seal materials including Polysteel and Ameriflex™
- Unique PolySource Validation System for temperature mapping and sampling through existing gasket connections
- Custom screen, sintered-metal and sock-style filtration gaskets and orifice plates
- PolyConnect compression-control gaskets to minimize gasket intrusion into process
- Advanced Detection metal-detectable gasket materials

Silicone Hose and Tubing

- Complete offering of translucent tubing and braided hose products
- Proudly manufactured at FlowSmart's world-class cleanroom facility in New Seaford, Delaware

Ace Hose

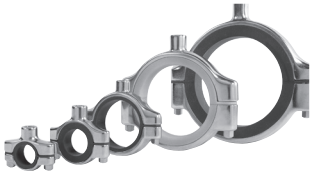

acesanitary.com

- Sanitary and Industrial hose, fittings, and hose assemblies
- Teflon, Silicone, Food grade rubber compounds.
- Industry leading service, factory inventory for rapid turnaround
- Patented Seal-Rite fitting design insures sterility at the coupler stem and hose joint

Seepex Progressive Cavity Pumps

seepex.com

- Positive Displacement progressive cavity technology for difficult-to-pump fluids
- High viscosity fluids, abrasives, gentle handling, filling and metering applications
- Sanitary design for product sterility and ease of cleaning

Stauff

stauffsanitary.com

- Specially-engineered tubing hanger systems for sanitary environments
- Rounded surfaces and silicone inserts minimize entrapment areas and enhance cleanability
- Unique Slope-Right design facilitates in-field adjustment to guarantee drainability
- Custom mounting systems including floor mounts available

QSM—*Process and Utility Valves*

tru-flo.com

- Hygienic Stainless Steel Ball, Butterfly and Check valves
- Actuation and Positioner packages
- Same day and quick turn deliveries

PROSYS—*Containment and Sampling Technology*

prosys.ie

- Custom-designed Downflow Booths for operator safety during formulation
- Isolators to insure complete separation between operator and product
- Custom engineered sampling systems enable high-integrity sampling of dangerous or challenging processes

Assmann Tanks

assmann-usa.com

- Huge selection of polyethylene tanks up to 12,000 gallons of virgin resins with no re-grind
- NSF Certified High-density crosslink chemical tanks
- Linear polyethylene tanks certified to NSF61 Drinking Water System Components
- Custom designs and fabrication available in horizontal and vertical styles

United Industries—*Sanitary Tubing*

unitedindustries.com

- Sanitary, Pharmaceutical, and BPE-compliant tubing
- Laser-welded technology in SFT1 (20RA Max ID/32 RA OD) and SFT4 (15RA Max EP ID/32 RA OD) finishes

HAM-LET—*Instrumentation Valves and Fittings*

ham-let.com

- Complete line of Let-Lok and One-Lok compression fittings and flare fittings
- Instrumentation valves including ball, needle, check, relief and metering configurations
- Ultra Clean valves for semi-conductor applications including high and low-pressure service
- Actuators, block style valve manifolds, quick connectors, and filters

Transair—*Advanced Air Piping Systems*

parkertransair.com

- Innovative modular aluminum Compressed Air Piping System in ½" thru 6" sizes
- Significant savings on installation and maintenance
- Reduces energy usage in compressed air systems by improving air flow
- Removable, reusable quick connections guarantee leak-free operation
